

## **Group 7 - Qos - FFI - 30.04.12**

Håvard Tørresen, Jan Alexander Bremnes, Jørgen Nordmoen, Magnus Kirø, Ola Martin Støvneng, Stig Tore Johannesen.

## **Introduction**

Week 16 and 17 have been used to write the report and documenting our code base. We have also done some minor changes to the code base, based on bugs we have encountered.

## **Progress summary**

The last two weeks we have fixed some minor bugs and semantics in our code base. Other than that we have mostly worked on the report and written all the section that we thought necessary. hopefully we will fix all the feedback elements this week and deliver our final report by the end of week 18.

## **Completed tasks**

The report have been “completed”. in the sense that we have written all the sections and don’t plan on adding more text to it.

## **New tasks**

There were no new tasks in this period.

## **Planned work for next period**

As of now we have more or less completed everything we were supposed to do. The only thing remaining is minor adjustments and typo fixing in the report. We are waiting for feedback at the moment and will update the report according to the feedback when we get it.

## **Other changes** (risks analysis, etc)

There have been no other changes.
