

## **Group 7 - Qos - FFI - 08.03.12**

Håvard Tørresen, Jan Alexander Bremnes, Jørgen Nordmoen, Magnus Kirø, Ola Martin Støvneng, Stig Tore Johannesen.

## **Introduction**

Everything is in order. We're on schedule and delivery deadlines are being reached.

## **Progress summary**

We wrapped up the last of the design, with diagrams and textual descriptions. Coding has commenced and the midterm report is getting the finishing touches. Our time estimation is a bit off, but so far so good.

## **Completed tasks**

Client report introduction  
Update client use cases  
Integrate Client documentation  
Update Client documentation  
Client implementation start up  
Update client WBS  
Set up Apache synapse, HTTPComponents and WSO2 so we can make changes.

Among others, see the activityplan for this week for a full update.

## **New tasks**

There are no new tasks this week.

## **Planned work for next period**

Mainly coding and implementation. See the activity plan of week 11 for details.

## **Other changes** (risks analysis, etc)

As we predicted illness did appear. One team member was ill and as a result was absent the last day of last week and the first day of this week. This turned out not to be a problem as we have considered the risk in our risk evaluation process.
