

Group 7 - Qos - FFI - 15.03.12

Håvard Tørresen, Jan Alexander Bremnes, Jørgen Nordmoen, Magnus Kirø, Ola Martin Støvneng, Stig Tore Johannesen.

Introduction

This week has mostly been used for implementation. This week people have also been a bit absent from our work periods which is reflected quite a lot in the Activities plan. This is something that we are going to improve going forward.

Progress summary

Most of the server side implementation has been finished, and our HttpComponents-patch has been accepted into HttpComponents¹.

We have also gotten WSO2 to work with all our mediators which is quite good regarding time spent so far.

The client side has not had as much progress as the server side, and we may have found some obstacles concerning the libraries we wanted to use for http-communication.

Completed tasks

- See activity plan 11, what is 100%
- DiffServ mediator

New tasks

- DiffServ mediator
- HttpClient to HttpCore transition

Planned work for next period

[Detailed activity plan for the coming period; see ActivityPlan 12]

Other changes (risks analysis, etc)

[Risk list. Comment on changes to the list that have influenced your activity planning. And any other eventualities that we can't add any other place.]
